**QUARTZ TILE IN COMMERCE**

Rikett Quartz Tile has a proven track record in industrial facilities. Especially in applications with heavy rolling loads, pallet jacks and forklifts. RQT's 3500 psi and flexible composition enable it to thrive in back-of-house applications, factory floors and warehouses.

Rikett Quartz Tile helps create a durable and stable floor surface where busy traffic exists. This long lasting floor comes in four different running line patterns, which all work together with coordinated neutral field color palettes and vibrant accent colors.

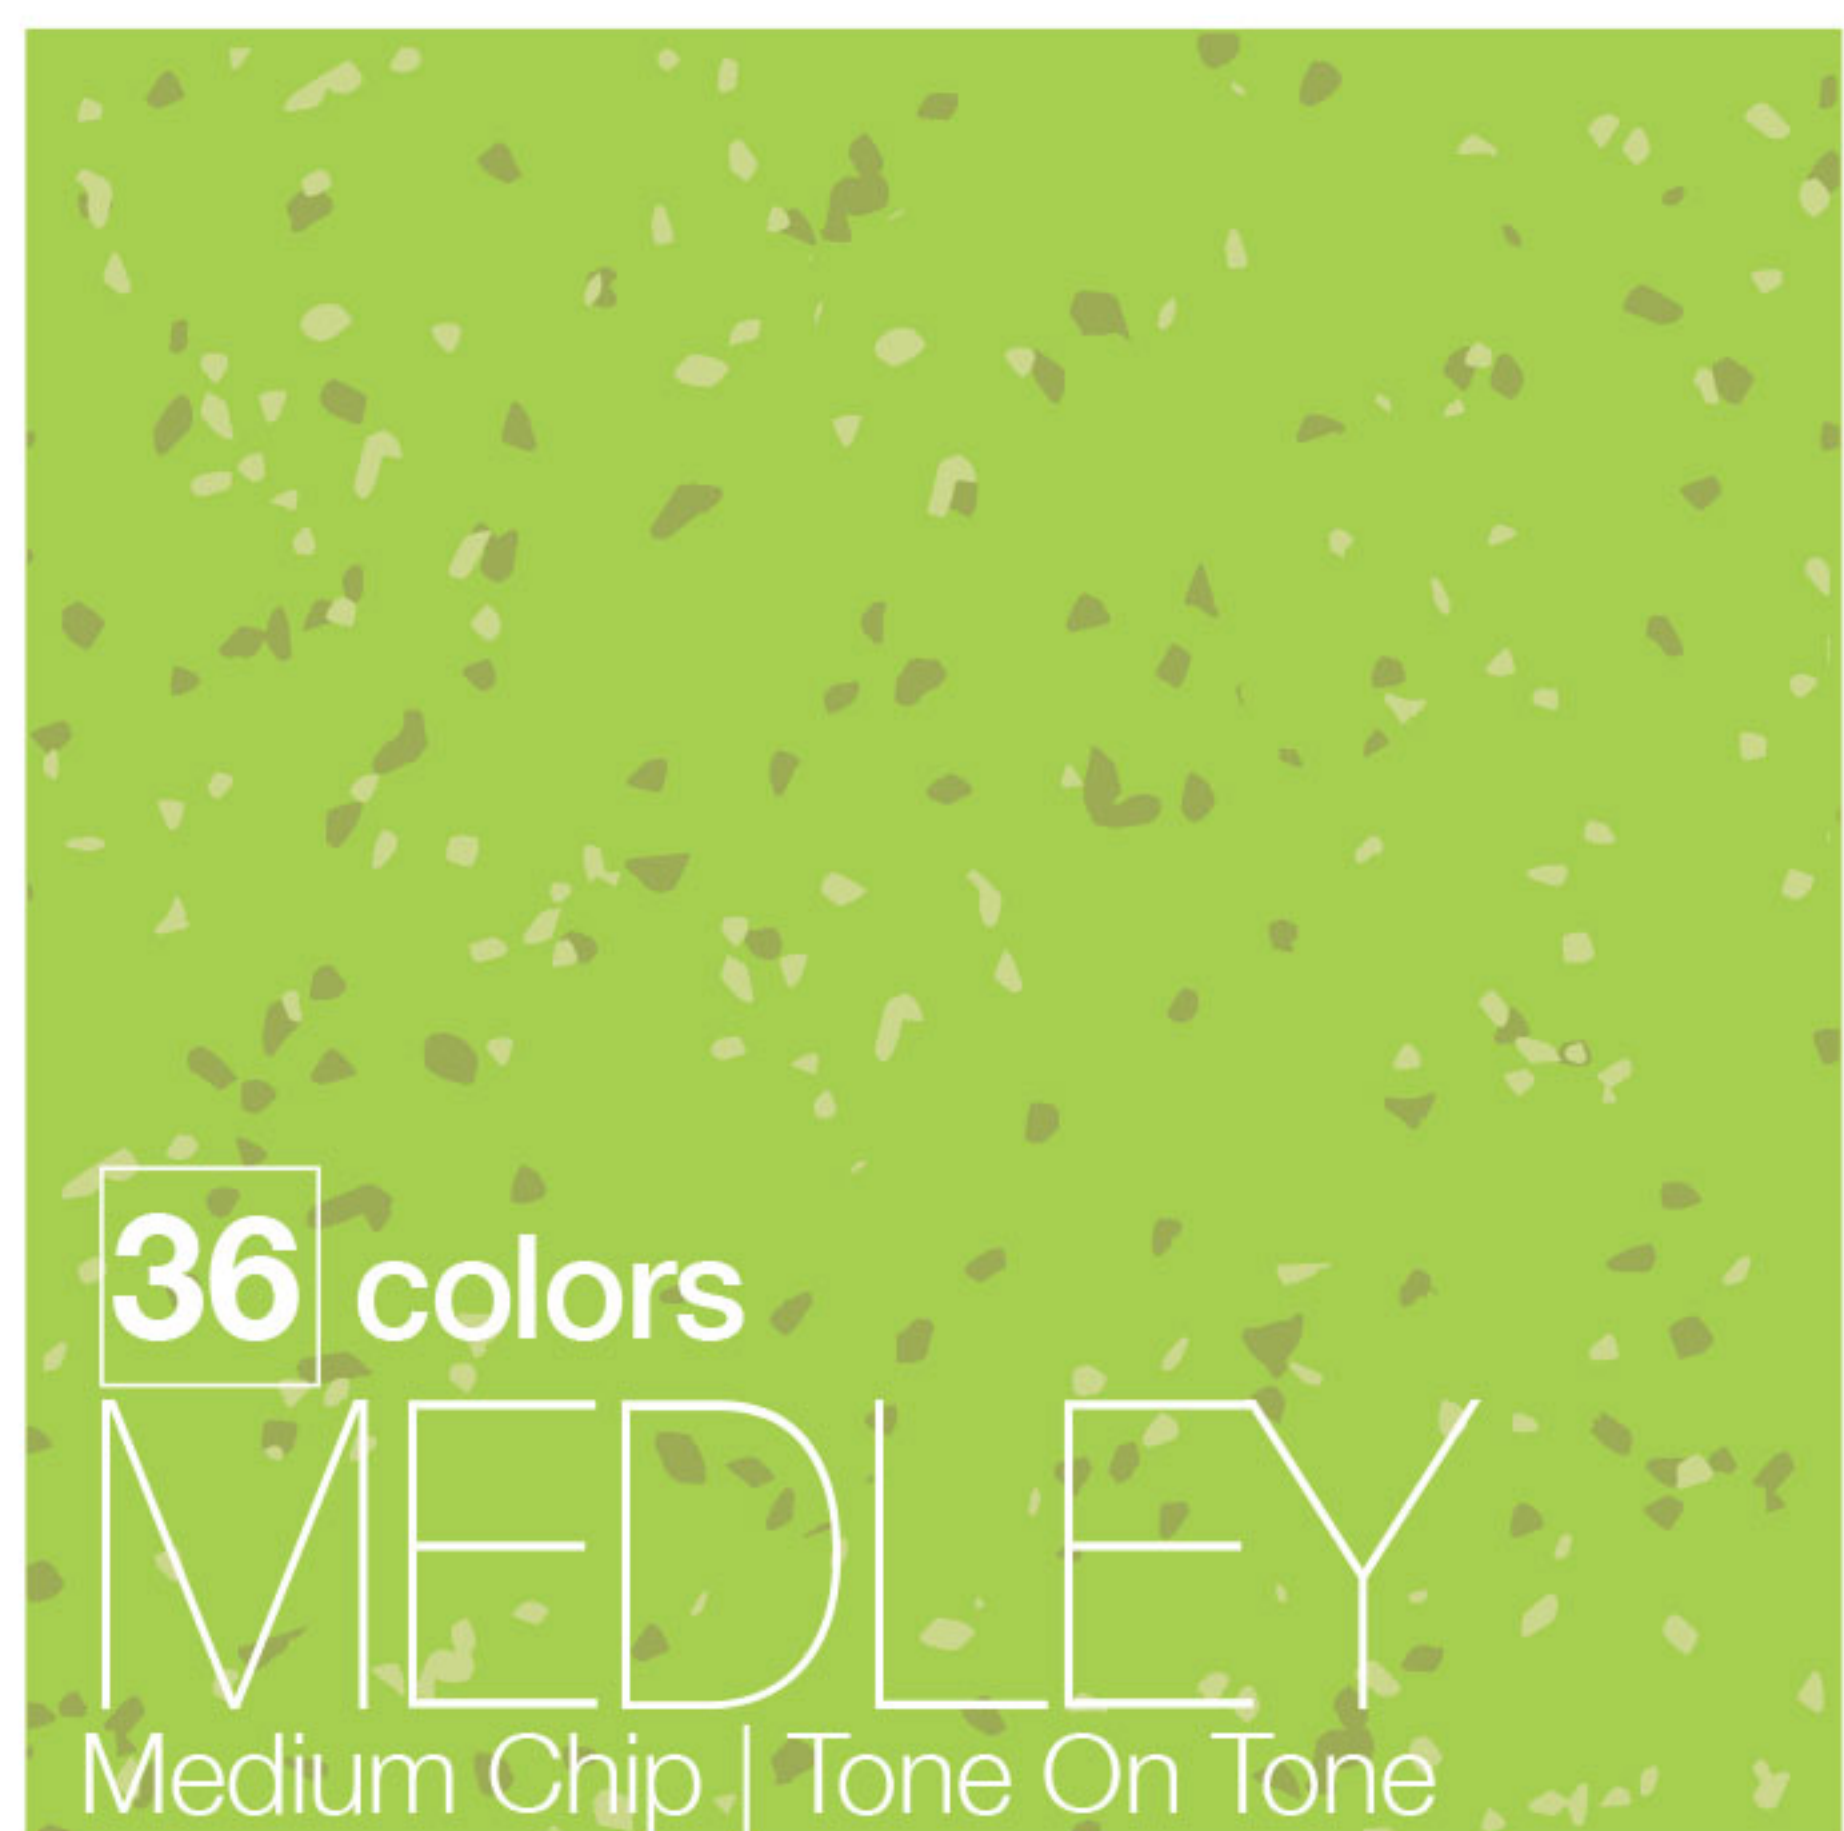

**Quartz-strong tile provides superior durability:**

- Homogenous, no color wear through
- Highly resistant to impact and indentation
- Resists scratches
- Flexible, highly resistant to cracking

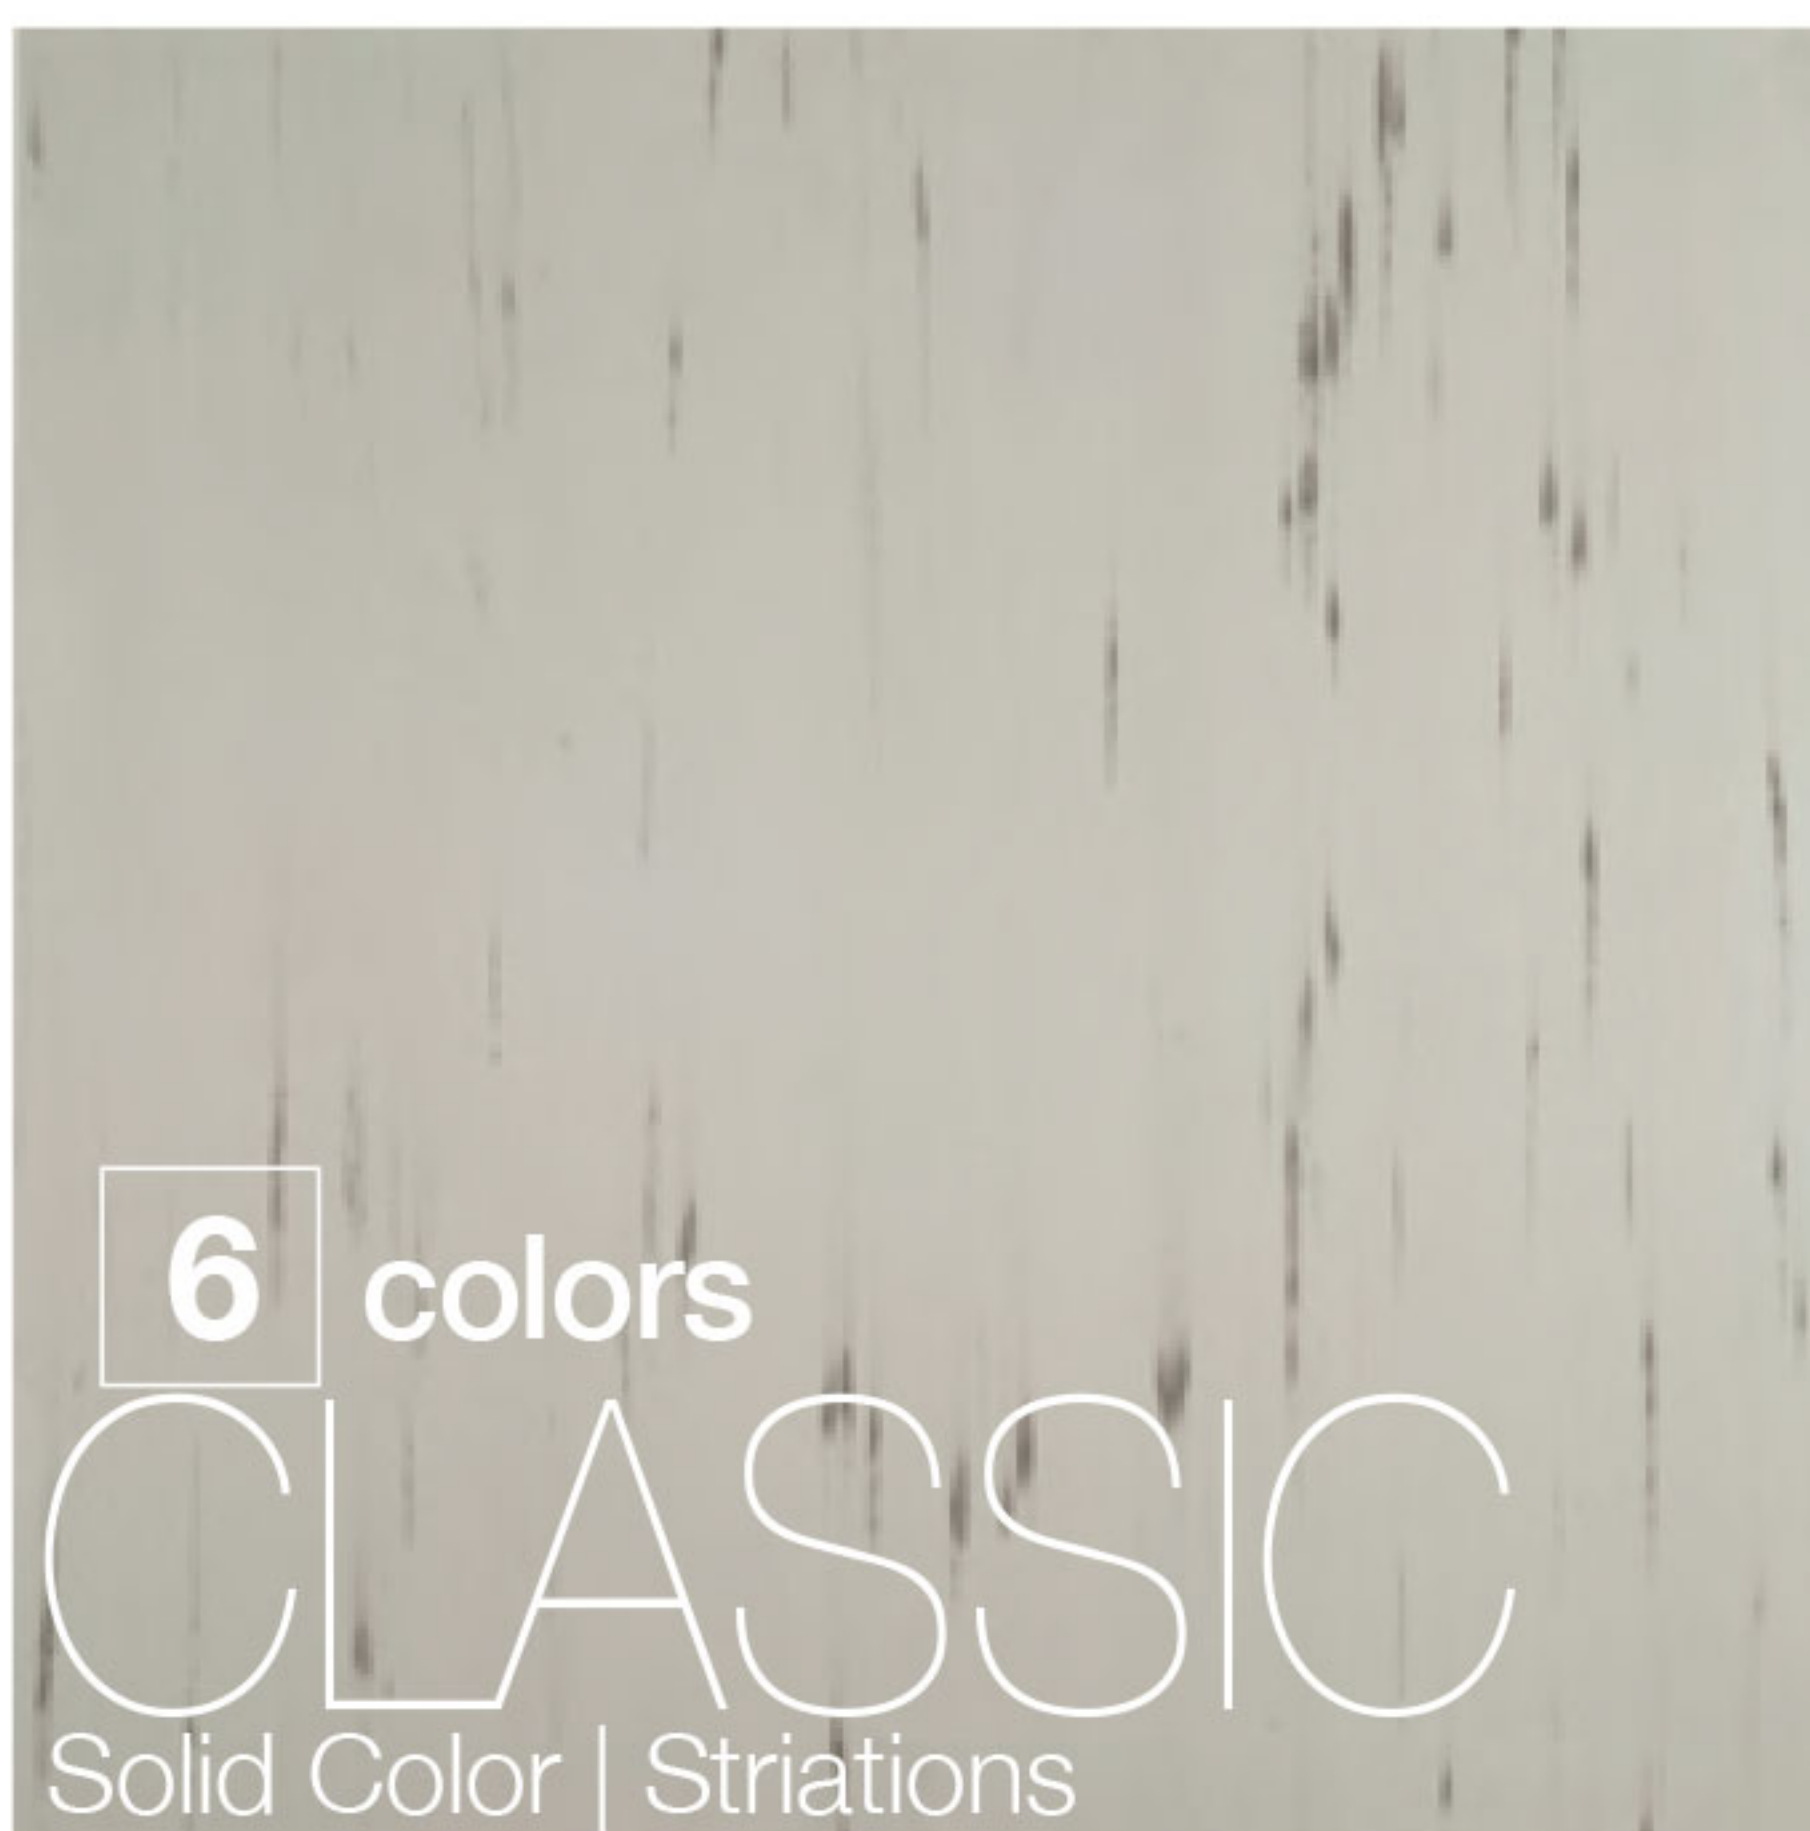

**Additional benefits of Rikett Quartz Tile:**

- Dimensional stability – up to 3,500 psi
- Green Certified – Low VOC's
- 100% recyclable
- Easy to clean and maintain
- Contributes to LEED credits
- 20 year limited warranty

- RETAIL
- HOSPITALITY
- INDUSTRIAL**

*Custom colors available upon request*

*All items displayed in the RQT sample book are stocked in the US.*

### Of note:

- RQT is manufactured with 70% natural quartz minerals, which make it a very hard, durable and dimensionally stable tile that will not break or tear like other floor tiles.
- Large format tiles sized offer a premium visual and design flexibility. Larger tiles install faster and have less seams. Designers love the vibrant colors and coordinated solid and chip pattern product lines.
- RQT can be used in heavy commercial and industrial applications. It has up to 3,500 PSI. Its excellent dimensional stability resists shrinkage, reducing seam gaps where bacteria might hide. RQT does not promote the growth of infectious organisms.
- Rikettseal™ enhanced, commercial grade UV cured polyurethane coating provides for a durable, low-cost, no wax, easy maintenance flooring surface. Can be recoated, if needed.
- Rikett offers a 1-year product defects and a limited 20-Year wear-through warranty.
